Domes For Your Events! (The Domes Cover Everything)

New possibilities for endless opportunities!

GeoKupol Ltd. offers you a unique product - ideal for any kind of occasions, temporary recreation parks, restaurants, shops, swimming pools, tennis courts and many more. Having a spherical form, the dome would attract anybody in the sight distance. Intensified with additional lights, music or even video projections, the effect will be maximized.

GeoKupol Ltd. designs, manufactures, **sells and rents out** various types of pavilions. The domes we offer are manufactured in our factory.

You can choose from various dimensions, colors, types and materials. The only boundary can be your imagination!

The acoustic inside the sphere is perfect, because of the shape of the structure that doesn't allow the sound to resonate

In table No:1 you can find dome type, size of the floor, height of the construction and capacity of sphere in number of people.

If need be the domes can be joined together with tunnels creating huge complexes.

Table 1

dome type	height in meters	diameter in meters	area in sq. meters	capacity per dome			
				max. number of people	sitting places	or sitting places with buffets	or round tables for 4 peoples
Geo6	3	6	28	33	25-28	18-23	5
Geo7	3.5	7	38	46	36-45	32-37	6
Geo8	4	8	50	63			
Geo9	4.5	9	63	82	58-75	43-50	9
Geo10	5	10	78	100			
Geo11	5.5	11	90	115	82-98	58-65	13
Geo12	6	12	113	145			
Geo13	6.5	13	132	170			
Geo14	7	14	153	197	134-160	100-115	20
Geo15	7.5	15	176	227			
Geo16	8	16	200	258			
Geo17	8.5	17	226	290			
Geo18	9	18	254	340			
Geo19	9.5	19	283	370			
Geo20	10	20	314	415	280-340	215-261	39

The internal space is open for all your requirements. The construction of the dome is so

strong, that does not need supporting pillars if covering up to 3000 sq.m. Due to the specific shape it can withstand massive pressure, therefore heavy video and audio equipment can be directly attached to the construction.

Our product, depending on the size, can be easily assembled for 1 to 3 days.
